CAMEOS, INTAGLIOS, STONES, &c.

Do	1480 Cameo, Jupiter Olympius with his eagle at his side, <i>fine work</i> , oval	1	5	
	<i>1¼ in. by ⅝.</i>	1		
White	1481 Small Cameos, female bust to left, head of a philosopher, and a female head, full face	3	11	

- 7 15. 1482 Small oval Cameo, THE BIRTH OF BACCHUS, agate with a semi-transparent ground of a light bluish white, the figures in opaque milk white, in the centre is a semi-draped female seated near the trunk of a tree holding the infant god; on the right is another nymph, quasi nuda, standing and leaning forward as if caressing the child; on the left is an exquisitely beautiful nude figure of Silenus, stooping forward and supporting himself with the left hand against the tree
- size $\frac{3}{4}$ by $\frac{5}{8}$ of an inch. 1
- * * This most beautiful specimen of art has unfortunately been broken, and has lost about one-eighth of the whole, but with the exception of having carried off the legs of the female figure on the right, the fracture has not interfered with the subject; in all other respects, the stone is perfect, highly preserved, and of matchless execution and beauty. It was found by a female peasant whilst gleaning in a field near Macri, the ancient Telmessus.
- 1 10. 1483 Intaglio, subject, two figures, said to be intended for the soothsayer Calchas, and Chryses the priest of Apollo at Chryse? or possibly of Agamemnon, and Chryses, *fine work* 1

- 2 5. 1486 Intaglio, a man hauling a galley over waves, on the galley is a butting bull between a crescent and a star, *good work*; another, St. George on horseback killing the dragon; another, a lion walking, *all fine work* 3
- 1 7. 1487 Fifteen engraved Stones, some of modern work; three Stones not engraved; and the head of a horse? in green stone, perforated for suspension 19
- 5 7 6 1488 A Cylinder, in form as those called Babylonian, but inscribed with Egyptian hieroglyphics diameter $\frac{5}{8}$, length $\frac{7}{8}$ of an inch. 1
- * * The colour of the stone of this cylinder is black, and soft, easily yielding to the knife; the inscription is divided into four compartments, and by high archæological authority at Berlin, has been pronounced of an extremely early epoch, either of the 12th dynasty of Manetho, or of the commencement of the 13th; the inscription, by the same authority has been rendered HONT. EN. HOTE. SCHAM. HET. MATV., and translated into "The Priest of the Sacrifices, (that is of the order called by the Greeks ΠΡΟΦΗΤΗΣ.) Scham Het, &c." This interesting and extremely valuable relic was found by a Greek in the Island of Cyprus, in the autumn of 1847.

		* * This tessera, or seal of the initiated (Mystoi) of Brysæ in Laconia, is probably the only known monument of that ancient city. In Pausanias' time, Brisæ, or Brisæ appears to have been of but little importance, for he says (Laconics cap. xx.) "on leaving Taygetus, you will arrive at a town which was formerly the City of Brisæ. In this place there is yet a Temple of Bacchus, &c.," this curious relic was recently exhibited before the Society of Antiquaries, and is published in the last number of the Society's Proceedings.

623 NEWTON (Sir Isaac) A LOCK OF HIS HAIR, *authenticated* 1 157

* * The accompanying lock of Sir Isaac Newton's hair was given to the present owner by the Rev. George Adam Browne, one of the senior fellows of Trinity College, Cambridge. It formed a portion of a lock at that time in his possession, and subsequently deposited by him in the library of Trinity College. The present owner received the lock in question from the Rev. G. A. Browne in November, 1837, and it has been in his possession from that time until the present.

624 NAPOLEON BONAPARTE. AN ORIGINAL, AUTHENTICATED, AND VERY SPIRITED COLOURED DRAWING, REPRESENTING AN ATTACK OF ARTILLERY, *drawn by Bonaparte when a student at the Polytechnic School at Paris* 1 612 6

* * It was purchased by the present owner of a dealer in curiosities at Paris in 1835 (the dealer having previously obtained it of the Marquis de Parois.) At the time when the present owner bought it, it was mounted upon a piece of thick card board, which, having become soiled and broken, was removed, and replaced by the mount on which it now appears. On the removal of the old mount, the following words, with the signature Renault, appeared on the back of the drawing itself:—

“Ce dessin l'ouvrage de Napoleon lui-même fut exécuté pendant son Séjour à l'école Polytechnique à Paris.— Paris, 1802.”

It has been subsequently ascertained that the head of the Polytechnic School at Paris, at the time that Bonaparte was a student there, was Renault; so that the genuineness of the sketch may be considered as satisfactorily proved, especially since the discovery of this memorandum was perfectly accidental, and it cannot be imagined that its existence was known to the former possessor of this remarkable drawing.

625 CHARLES I. HAIR FROM THE HEAD AND BEARD OF CHARLES I, AUTHENTICATED 1 526

* * On the 1st April, 1813, Sir Henry Halford made an examination of the coffin of King Charles I. in the vault of King Henry VIII, under St. George's Chapel, at Windsor, in the presence of the Prince Regent, the Duke of Cumberland,

Count Munster, the Dean of Windsor, and Mr. Benjamin Charles Stevens.

"The coffin was of plain lead, had no appearance of ever having been enclosed in wood, and bore the simple inscription—KING CHARLES, 1648.

"The hair was thick at the back part of the head, and in appearance nearly black. A portion of it, which has since been cleaned and dried, is of a beautiful dark brown colour. That of the beard was a redder brown.

"The forehead and temples had lost little or nothing of their muscular substance; the cartilage of the nose was gone, but the left eye, in the first moment of exposure, was open and full, though it vanished almost immediately, and the pointed beard, so characteristic of the reign of King Charles, was perfect.

"The shape of the face was a long oval; many of the teeth remained; and the left ear, in consequence of the interposition of the unctuous matter between it and the cere cloth, was found entire.

On holding up the head, to examine the place of separation from the body, the muscles of the neck had evidently retracted themselves considerably, and the fourth cervical vertebra was found to be cut through its substance transversely, leaving the surfaces of the divided portions perfectly smooth and even, an appearance which could only have been produced by a heavy blow, inflicted with a sharp instrument, and which furnished the best proof wanting to identify King Charles the First."

Such is Sir Henry Halford's own account of this interesting operation. The locks of hair in the accompanying case were on the above occasion cut from the head and beard by Sir Henry himself, and by him presented to their present owner.

METAL MIRRORS.

- 4 . 406 A METAL MIRROR. 1 *Jones*
- * * * This was discovered in a grave at CHUISI, in the year 1826, and published by Micali, (*Monum p. servire alla Storia d Ant. Popoli, I. XLVI.1.*), with the words "Castor e Pollux amorevolmente abbracciati da un 'altra figura d' ignoto nome." Gerhard (*Etruscan Mirrors, I. 56, I.*) recognizes in these figures Cabiric deities, in the presence of Minerva, and of Venus, who bears the cista mystica. According to the Etruscan inscription engraved above the different figures, the following is the subject of the composition upon this mirror:

Chalucasa, "the brazen," (Talos) beardless, leans upon Kasutru (Castor), whom he encircles with his left arm, and upon Palutre (Pollux), around whom his right arm is entwined. He advances towards Minerva, who, helmeted, and armed with the lance, is glancing at Venus (Turan); the latter stands at the right extremity of the scene, in a stooping attitude, and has just opened a little box, probably to take medicaments from it. From the explanation of Panofka (Archæolog. Zeitung. Jahrg. IV. S. 317), it would appear, doubtless, that it is a representation of the death of Talos, for the Etruscan name Chalucasa, as a surname of Talos, signifies "Chalcas," miner; and his embracing the two Dioscuri, recalls his manner of receiving strangers. This mirror indisputably belongs to the most interesting compositions of this kind.

* * This stone having most likely been the pedestal of an antique statue of Paris, the hero is relating his deeds. The Duke of Buckingham possessed this antique monument, to whom Sir Gore Ouseley gave the following explanation : " Colonel Leake supposes that the lines now on the stone, are the conclusion of a longer inscription; and I confess that I was of the same opinion (until you assured me of the contrary), in consequence of their commencing with the word

KAI 'and;' however, this conjunction may be used as the word, also,' which will make sense of it. According to Colonel Leake's reading, the translation would run thus, (supposing Paris speaking): 'I sufficed also to my country, with my slaughtering sword; and I killed Achilles in the vigour of his age. I resisted up to the tenth year of the Greeks; but no one has any power against the thread of the Fates.' Mr. Hamilton considers the word YIE, a little puzzling, but as it might be addressing his friend or successor, as well as 'O my Son,' it may answer. The date of the inscription may be the century before our æra."

CHINESE BRONZES.

BRONZE IMAGES FROM THE SACRED ISLAND OF PATO,

NEAR THE MOUTH OF THE YANG-TSE KIANG.

- 437 FIVE FIGURES; the centre one representing the Buddhist
 Deity Quonyem. 5 ft. 7 in. high. 5

* * * The particulars relative to these figures are doubtless contained in manuscripts found in the interior of these very idols, which have not yet been deciphered. These unique bronze figures were obtained by Major Edie from the *priests of the island*, and exhibited by him at the Crystal Palace in 1851. The attention of public museums is drawn to these rare works of *ancient Chinese art*; it is fully believed, that no Chinese bronze figures of *similar importance* are to be met with in any place in Europe. It may also be anticipated that during the present Chinese rebellion the party who profess Christianity will, in their religious fanaticism, destroy all the Buddhistic images in the temples; and, therefore, these relics of Chinese idolatry would be *very valuable* to an *Ethnological* museum.

- // // . 437* A MAGNIFICENT SILK EMBROIDERED CURTAIN; supposed to have been made to commemorate the anniversary of an Emperor reigning sixty years, and presented to one of the large temples of China near *Ningpo*. The colours are supposed to be from mineral dyes, and appear to have the property of *renewing themselves* by excluding the light.

* * This article was also exhibited in 1851.

- 3 . . 437* A VERY ANCIENT AND BEAUTIFULLY EXECUTED BUDDHISTIC DIVINITY, in bronze. 16 in. high. 1
* * This is very interesting from the technical treatment, the figure being done in one casting, though there are so many projecting parts, it is also unusually light.
